WOOD MEETS COLOUR

TIPS FOR WOOD ENTHUSIASTS

WOODEN FLOORING
HAS TO BREATHE

DO IT DIFFERENTLY!
ADD COLOUR!

A NEW COLOUR,
A NEW LEASE OF LIFE

Worldwide sustainability is one of the most important topics in media, politics and society. In the debate about our future, forests are taking on a prominent position. Whether it be the rainforest, whose preservation we so desire, or the local forest, which we must protect against the results of hot summers. Wood is valuable for the climate.

Wood is a climate-neutral building material; after all, trees absorb carbon dioxide and give off oxygen. During its creation, wood uses up carbon dioxide, instead of producing more. This is why we offer coatings that meet the specific properties of wood as well as your personal requirements. Our Polyx®-Oil, for example, protects your wooden floor from the inside; it penetrates wood and allows it to "breathe".

**COATINGS MUST SUIT WOOD:
NATURAL PROTECTION FOR YOUR
WOODEN FLOOR.**

Polyx®-Oil supports a healthy living because Osmo only uses natural oils and waxes, such as sunflower and soybean oil. Polyx®-Oil is produced in our own plant in Münster –

without any heavy metals, biocides, preservatives or allergy-causing turpentine oils. Nevertheless, it offers optimal protection against dirt and scratches, and it is resistant to wine, beer and cola.

Varnishes, on the other hand, seal off the wood surface. This means that your wooden floor is less resistant to fluctuations in temperature and to moisture penetrating the wood through tiny cracks in the varnish. The solution: sand down your varnished floor and then treat it with a wood-friendly coating from Osmo. This gives you a sustainable solution, because our coatings can be applied again and again, and in turn require less work.

BREATHE**

CREATE A GOOD FUTURE
FOR HUMANS AND NATURE
WITH OSMO

EXCITING ACCENTS ON WOOD

Polyx®-Oil Original

This clear wood coating in four different sheens uniquely combines the advantages of natural oils and waxes in one product. It protects all solid wood flooring, such as plank and strip, as well as cork floors.

Polyx®-Oil Effect Natural / Raw

You can create a very natural look with this transparent, matt wood stain. It is suitable for the protection and nearly invisible coating of light-coloured wood species in indoor areas, such as wooden floors and furniture.

Polyx®-Oil Effect Gold and Silver

This transparent, pigmented wood stain produces a unique surface effect. It decorates dark wooden floors, such as Smoked Oak or Walnut as well as dark stained wooden floors and dark furniture surfaces.

Polyx®-Oil Tints

Light-coloured wooden floors can be decorated with this transparent, satin wood coating. Available in the colours: 3040 White, 3075 Black, 3067 Light Grey, 3071 Honey, 3073 Terra, 3072 Amber and 3074 Graphite.

40 g Wood Wax Finish White matt 3186

*
Colour mixture Dark Red:
90 g Wood Wax Finish Red 3104
12 g Wood Wax Finish Brown 3165

Red is the colour of love, passion, fire and danger. No other colour has such a presence, such emotional power as red. None is so vivid. Do you love red? Would you like to feel this irrepressible energy around you? Then get your brushes going!

RED IS A STATEMENT.

Red attracts attention. It's a bold colour. For people with self-confidence and an opinion of their own. Think about which area of your life you would like to add a little red: give the table in the living room or the chest of drawers in the bedroom your favourite shade of red and put it in the spotlight.

RED IS NO STRANGER TO VARIETY.

Osmo Wood Wax Finish 3104 Red bundles all the power of colour. But, of course, our colours can be mixed with each other: add a little white to red and you get a light-hearted and dreamy, soft colour. Red with a dab of blue becomes flirty and self-confident. Deep and exquisite – red with a splash of black creates an elegant cosiness. A trace of green or yellow gives the red warmth so it has an activating and positive effect.

LET US MIX YOUR
COLOR OF CHOICE. FROM
2.5 LITRES, WE CREATE
ANY CONCEIVABLE
COLOUR FOR YOU.
OF COURSE, THOSE
OUTSIDE THE RED
SPECTRUM TOO.

RED IS REALLY SIMPLE WITH OSMO.

Osmo Wood Wax Finish is not only flexible in terms of colour, but it is also easy to use and completely safe. The finish is suitable for wood, breathable and forms a wear-resistant and dirt repellent protective layer on floors, wall panelling, mouldings and beams, doors, furniture and children's toys. It is resistant to household chemicals as well as to both saliva and sweat. Your very own red.

THE MAIN ATTRACTION IN THE KIDS' ROOM

A games table is the centrepiece of every playroom. The more flexibly it can be used, the more popular it is for the wee ones. If you have school-age children, a multi-functional games table can be a perfect DIY project to keep the kids busy on a grey winter's day. Parents or grandparents do the sawing and drilling; the children paint and glue.

GET CREATIVE
WITH LEGOS
AND MORE

MULTI-FUNCTIONAL GAMES TABLE WITH OSMO FINISHES

With edge-glued panels and finishes from Osmo, wonderful children's furniture can be created. First, you need a edge-glued panel from Osmo, for example made of Spruce. High quality laminated wood is well suited to use in children's bedrooms. This softwood comes from sustainably managed forests in Scandinavia. After cutting the necessary parts to size, coat the pieces with Osmo Wood Wax Finish. It is easy to apply, wear and stain-resistant as well as fast to saliva and perspiration, and allows the wood to breathe. The bold primary colours 3104 Red, 3105 Yellow, 3125 Blue and 3131 Green are an excellent choice for children's bedrooms.

WWW.OSMO.DE/EN/DIY

CONVENIENT TOOLS AND ACCESSORIES FOR COATING WOOD

For finishing wood, it is best to use Osmo Flat Brush. To clean children's hands coated in blue and green, grab Osmo Easy Clean cloths. The games table can be designed as your children please. Exact instructions plus details can be found under www.osmo.de/en/diy – Have fun!

TOOLS:

- > Drilling machine with wood drill bits
- > Jigsaw, possibly a vice
- > Long metal ruler
- > Sandpaper (120 and 240 grit)
- > Brushes
- > Carpet knife

WHAT'S NEEDED

GAMES TABLE SURFACES:

- > Lego baseplates
- > Blackboard paint
- > Mirror foil
- > Furniture stickers as game boards or table landscapes
- > Cut-outs for bowls of various sizes

FUN WITH ART ON THE BLACKBOARD ELEMENT

Cool concrete and warm wood complement each other wonderfully. Therefore, more and more people are combining these materials in their homes. Osmo always keeps a close eye on the market: we notice trends and respond quickly. As your natural oil experts, we can now also provide you with an oil for maintaining concrete.

FOR:

- > NEARLY ALL TYPES OF EXPOSED CONCRETE
- > ARTIFICIAL STONES
- > SCREED
- > MICROPOROUS NATURAL STONE (POLISHED, GRINDED, BREAK, SURFACE)
- > UNGLAZED TILES

CONCRETE OIL: NATURALLY FROM THE OIL EXPERTS

CONCRETE SURFACES ALSO NEED PROTECTION.

Just like our products for wood surfaces, we have developed Osmo Concrete Oil based on natural oils and waxes, so that it is safe for you, your pets and your indoor plants. Clear satin Concrete Oil penetrates the concrete surface making the microporous surface water repellent, dirt and stain-resistant.

CONCRETE OIL MAINTAINS ALL HOUSEHOLD SURFACES.

With our Concrete Oil, you have an oil for all concrete surfaces in your home: it is suitable for wall and floor surfaces as well as for tabletops, windowsills or worktops. It keeps your concrete surfaces beautiful and well-kept for a long time, especially in wet rooms, such as kitchens and bathrooms.

AT OSMO YOU CAN ALSO RECEIVE ALL TOOLS FOR CONCRETE OIL.

HOW TO APPLY THE OIL:

Apply Concrete Oil very thinly with Osmo Flat Brush, Floor Brush, Oil Finish Applicator Fleece or Microfibre Roller and spread well. Then remove any excess material with a pad or a lint-free cloth. For larger areas, use Osmo Floor-Xcenter, which is available from Osmo dealers. After approx. 8 to 10 hours' drying time, the second coat can be applied.

DO IT YOURSELF:
IMPLEMENT YOUR IDEAS

FEEL AT HOME.
CREATE YOUR VERY OWN GARDEN.

HOLIDAY DESTINATION HOME: GET CREATIVE WITH WOOD AND COLOUR

Do you still have plans in the drawer that you have always wanted to carry out? Or do you need ideas? Treat yourself to a creative holiday at home, with fresh ideas and lots of breaks in between.

WHERE DO YOU FEEL MOST COMFORTABLE? OBVIOUSLY AT HOME.

After all, here is where you can freely shape your life, tackle things by yourself, and create something new or beautiful as you please. With Osmo wood and coatings, you can now design your home exactly the way you want it to be.

WITH OSMO, YOUR HOME WILL BE EVEN MORE BEAUTIFUL.

Summer is the perfect time for projects with wood and finishes. As specialists in wood and wood-friendly coatings, Osmo shows you what wood and finishes have to offer. We give tips on how to get creative with our products. Turn your home into your favourite holiday destination.

BUILD IT YOURSELF:

YOUR GARDEN HIGHLIGHT: A RAISED FLOWERBED

A herb garden is not just an aesthetic highlight of every garden. It smells good in summer evenings – harvest fresh basil, thyme or rosemary every day. Both kitchen and medicinal herbs do not require much care and usually thrive on their own. In a raised flowerbed, they grow faster and there are fewer weeds because the main flight of seeds takes place on the ground.

A raised flowerbed in a class of its very own is what André Schwabe has made. The bed arrangement and the white structure - made of narrow wooden beams – are what makes this raised flowerbed special. For André, it should create an aesthetic highlight in the garden and include a bench to enjoy the smells. The smaller flowerbed on the side is suitable for planting herbs separately. The writing “Herb Garden” gives the whole thing a decorative touch. Want to build your own raised flowerbed?

ALMOST MORE BEAUTIFUL THAN NEWLY BOUGHT

With our Garden Colour Traffic Grey 7542 and Osmo Flat Brush, this high chair looks like new.

A NEW COAT

NEW:
GARDEN
COLOUR

COMPLETELY NEW OR OLD TREASURES REFRESHED

Wood and colour go together well when coordinated correctly - like with Osmo. Then everything in your garden can be colourful. And best of all: wood that has been treated with Osmo finishes can be refreshed again and again - usually without sanding. Looking for a new colour? Just give it a try.

OSMO COUNTRY COLOR USED CREATIVELY AND INDIVIDUALLY

A UNICORN IN THE GARDEN

For a period of time, we ran into unicorns everywhere: they stand for an optimistic outlook towards life and symbolize the good in the world. This example not only inspires children who are allowed to ride it, but has also made many new fans at Osmo.

FOR ALL STAGES IN LIFE

This baby's room with a freshly coated, homemade changing table could have come straight out of a design catalogue. Our Wood Wax Finish 3186 White Matt was used here. High quality wooden children's furniture is wonderfully suited to renovation: it lasts for generations and only the surface wears out, so such furniture can be restored again and again.

**WONDERFUL,
A LOVINGLY
FURNISHED
BABY'S ROOM.**

**SIMPLY PERFECT,
IN FIR GREEN**

THE PRIDE OF THE GARDEN

This new garage is really impressive. The wood finish harmonizes perfectly with the dark window frames and doors. The planters give the garage a friendly touch.

**A REALLY
IMPRESSIVE
PROJECT - COATED
IN OSMO**

WELCOMING AFTER A NEW COAT

This barn door has been recoated with Osmo Country Colour 2404 Fir Green. This darker shade of green forms a nice contrast to the red brick masonry.

NEW:
GARDEN
COLOUR

**A NEW
COLOUR,
A NEW
LEASE
OF LIFE**

Garden fences, garden sheds, playgrounds or timber cladding can shine easily in a new light thanks to new Osmo Garden Colour.

**CUSTOM COLOURS:
HAVE THE COLOUR
OF YOUR CHOICE
MIXED TO ORDER
- STARTING
FROM 2.5 L.**

For over 10 years, this small wooden wagon has stood in the Duncan's garden. Miranda Duncan's greatest wish: breathe new life into her old playhouse, make it the jewel of the garden and be able to use it again. Her grandfather bought the playhouse for her and her brother. Thanks to new Osmo Garden Colour, after sanding away the old coating, a new coat could be applied without any primer - quickly and easily.

HIGH COVERAGE AND SHORT DRYING TIME

Regardless of whether you want to coat a fence, your garden shed or the playground equipment for your children in the garden, two coats in one day are now easily done. Garden Colour dries very quickly; it does not need any primer – that saves time and money. The high opacity and the even, satin finish give the wood a fresh look. The coating is microporous, is hardly susceptible to dirt and stains, and will not crack, peel or flake. Our Garden Colour works with almost no solvents and is, therefore, also suitable for children's playgrounds.

GET COLOURFUL

Your wooden fence needs a fresh coat? If you want to add colour accents and are looking for a new colour, you will find what you are looking for with our Garden Colour. The bolder the colour, the more dominant it looks. It can either create a strong contrast to the house colour or suit the colour of the house, in other words keeping with the same colour scheme, which creates a truly harmonious look. The selected colour can also be easily adjusted for window frames, wooden doors or garden sheds and turn the entire property into a real eye catcher.

LIGHT-DARK COMBINATIONS WITH SOFT COLOURS LOOK HARMONIOUS.

VARIOUS EFFECTS WITH OSMO GARDEN COLOUR

Osmo offers Garden Colour in different colours, each one with its own effect. Warm tones, like our 7103 Signal Yellow, have a heart-warming, welcoming feeling, while cooler tones, like Osmo 7519 Capri Blue, give the feeling of a fresh sea breeze. Decide for yourself what suits best.

Use our sample sachets to make a trial application. Simply request sample sachets in the desired colours from your local Osmo dealer.

CLADDING: ACCENTS FOR INDIVIDUALITY AND ORIENTATION

Especially in housing estates where the houses often look identical, for example terraced houses or holiday villages, accents can be created with Osmo Garden Colour. The colour of choice not only reflects the personality of the house's residents, but also various colours break up the appearance of the street. Our tip: before choosing a colour, find out which guidelines apply to your housing estate.

CUSTOM COLOURS AVAILABLE

Your favourite colour is not in our standard range? The colour of your choice can be easily ordered from your local Osmo dealer. Starting from 2.5 l per colour, Osmo mixes RAL and NCS colours to order.

NEW
TO THE OSMO
RANGE

ADD ACCENTS

NEW: GARDEN COLOUR

Two coats in one day:

Our new Garden Colour dries very quickly – just simply apply, without priming, without sanding. It has an even satin sheen and high hiding power. The low-solvent finish is microporous and hardly susceptible to dirt, and it will not crack, peel or flake.

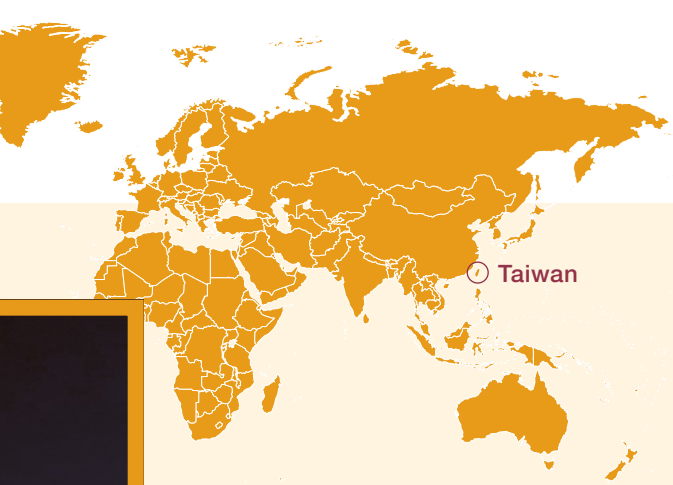

ETERNITY FOR A WORK OF ART

A landmark for the wood industry in the region - this is how the famous art installation “Song of the Forest” by the artist Wang Wen-Chih in Chiayi, Taiwan can be described. The local forest areas shape the nature of the region and, at the same time, form the basis of its economy. Besides rattan and copper, railway sleepers and boulders give the structure a unique character. The main part, however, consists of wood.

How to use Osmo One Coat Only HS^{Plus}

Of course, our One Coat Only HS^{Plus} protects not only tourist attractions, but also carparks, timber cladding, balconies, fencing, pergolas, garden furniture and sheds. One Coat Only HS^{Plus} is also suitable for renewing old, microporous wood stains. Due to its high solids content, it is very economical: one litre covers approx. 26 square metres. One Coat Only HS^{Plus} smoothens the wood surface and will not crack, peel or flake. This transparent, satin wood stain based on natural oils is available in 13 different colours.

OSMO ONE COAT ONLY HS^{PLUS} PROTECTS LANDMARK IN TAIWAN

WOOD COATING FOR LIFE-LONG BEAUTY

Osmo is the only manufacturer to finish their wood products with coatings developed and produced in-house. Osmo coatings bond with the wood and let it breathe. Exactly the right choice for a work of art as natural, airy and flooded with light as “Song of the Forest”. One year is what it took to install the work of art. So that it endures a much longer time, all wooden surfaces are coated with One Coat Only HS^{Plus} from Osmo.

NATURE AT THE HEARTS OF OSMO AND WANG WEN-CHIH

Wang Wen-Chih uses natural materials for his works of art and aims to lead art lovers and visitors back to their roots in nature. He learned the traditional craft techniques for creating his works of art in the mountains of his home region of Chiayi. Both Osmo and the Artist are committed to preserving nature in different ways.

LONG-LASTING PROTECTION SAVES TIME AND MONEY

One Coat Only HS^{Plus} prevents the wood from swelling and increases its durability. It protects the wooden elements against the influences of the warm and humid climate in Chiayi; it makes the structure weather-resistant and UV-stable as well as water-repellent. Osmo One Coat Only HS^{Plus} is low in solvents and is produced without any biocides or preservatives. This coating based on natural ingredients is safe for humans, animals and plants. When after many years of wind and rain have worn the coating away, it can easily be recoated - without any sanding.

WELL-MAINTAINED THROUGHOUT THE YEAR

HOW TO ENJOY YOUR GARDEN
DECK AND FURNITURE FOR LONG
TIME THANKS TO OSMO

SPRING CLEAN

REFRESH

RECOAT

Wood will withstand sunlight, frost and moisture for many years – with regular protection and care that is suitable for wood. No matter whether it is decking, a garden shed, fencing or garden furniture: the Osmo range always has the right care product for you. Our tip: moss and dirt settle more easily on horizontal surfaces than on vertical ones. So, special attention should be paid to timber decking.

RECOAT

Once you have cleared the decking of dirt and weathering, it's time to coat. Our Decking-Oil smoothens the wood surface and make it repellent to dirt and water. Osmo has developed a whole range of Decking-Oil variants for individual wood species: they differ in colour or in penetration depth. Osmo Decking Brush is suitable for applying our Decking-Oil to the surface. It is also included in the Decking Brush Set - along with a tray, tray inserts and an Osmo Flat Brush.

SPRING CLEAN

Decking made of untreated and oiled wood is cleaned effectively with our Decking Cleaner. Depending on how dirty the garden deck is, mix the concentrate with water in a ratio of 1:25 to 1:1, and apply with Osmo Decking Cleaning Brush. For back-friendly working, simply connect Decking Cleaning Brush to Osmo System Telescopic Handle. A particular deep cleaning is achieved with Osmo Decking and Flooring Cleaning Machine: **available from your local Osmo dealer. Find the right dealer in your area at: www.osmo.com**

WHICH COATING IS RIGHT?

For your decking, we have developed a wide range of Decking-Oil variants – depending on the requirements. Fences, garden sheds, gables and balconies can also be treated with different products, for example Natural Oil Woodstain or UV-Protection-Oil. Osmo Anti-Slip Decking Oil is especially suited to stairs and pool decks. For a particularly long life, for example, for garden furniture, playgrounds and sandboxes, use Country Colour or Garden Colour. Teak-Oil Spray is particularly useful for treating chairs or tables with many edges and corners. **Our tip: make a list of your wooden items and surfaces in the garden. Ask your local dealer which Osmo products you can use to maintain and protect your garden furnishings properly.**

REFRESH

Restore greyed wood to its natural colour – with Osmo Wood Reviver Power-Gel. Simply apply, leave to work and scrub with plenty of water. Osmo Wood Reviver Power-Gel helps in three ways: in one step, the surface is cleaned, old flaky coatings are dissolved, and the grey patina is removed.

Osmo Paint Remover Gel removes old oil-based wood finishes and stains powerfully. This paste-like gel is used in the same way as Osmo Wood Reviver Power-Gel with a brush or with Decking and Flooring Cleaning Machine. We recommend treating the wood surface afterwards with an Osmo Decking-Oil. Before the application, the surface must first be neutralized with Osmo Wood Reviver Power-Gel after drying.
